TW Medical[™]
VETERINARY SUPPLY

TW Medical Veterinary Supply to carry Avalon Medical Products

STILLWATER, MN – August 26, 2010 - Avalon Medical Ltd. is pleased to announce the completion of a distribution agreement with TW Veterinary Supply. Beginning in November of this year, the complete line of PeriSeal Tissue Patches, PoliPhase Surgical Sealants and PoliPhase Dental Extraction Packing became available for order through TW Medical Veterinary Supply's sales team.

Founded in 1994, TW Medical Veterinary Supply has grown from a startup business to a nationally recognized leader in the animal health industry. TW Medical specializes in meeting the unique needs of veterinarians, universities, research facilities, zoos, and the armed forces. TW Medical carries a comprehensive line of over 8,500 products from more than 165 leading manufacturers of pharmaceuticals, surgical supplies and equipment. TW Medical is based in the Austin, Texas area and serves customers throughout the United States and as well as international customers around the world. Our headquarters are located in an 18,000 sq. ft. office and warehouse facility on six acres in the beautiful Hill Country area near Lake Travis, Texas.

In operation since 1998, Avalon Medical was founded to serve the veterinary community with cost effective, reliable, long-term implant products. Avalon Medical has worked closely with academic institutions and clinical practitioners to maximize the efficiency of our devices. The founders of Avalon Medical have in excess of thirty years experience developing devices for the human and veterinary surgical community.

Avalon Medical's research and manufacturing is conducted at our lab facility located in the scenic river valley of Stillwater, MN. By keeping the company vertically integrated, Avalon Medical is provided a greater level of flexibility to provide veterinarians with the most unique and innovative products available today.
